PERFORMANCE
WORK HOODIE

WATER REPELLENT

Durable Water Repellent (DWR) fabric stays dry in the wettest of weather.

ZEROSKRATCH™ ZIPPERS

Concealed zippers so they can't scratch a paint job or catch in all the wrong places.

PACKED WITH POCKETS

Endless tool storage thanks to front pouch pockets, a security cell phone pocket, and a sleeve utility pocket.

UNIFORM READY

The first DWR hoodie that withstands industrial laundering and the daily grind.

PROFESSIONAL GRADE

The comfort of a casual hoodie combined with the polished styling customers will respect.

NEW! Patented SafeCinch™ Feature

Drawstrings are tucked away in front pockets, eliminating loose strings and safety hazards.

Plus, this innovative functionality offers a neater appearance and easier laundering.

**AFTER PHYSICALLY ACTIVE WORKERS WORE THE
PERFORMANCE WORK HOODIE FOR TWO WEEKS,
THEY PREFERRED IT OVER THEIR CURRENT HOODIE.**

FLAME RESISTANT CLOTHING

Having the proper FR garments is vital to keeping your team safe.

The FR characteristics are permanent and remain for the life of the garment. Applications include the petrochemical, chemical, oil, and gas industries. They are also appropriate for electrical utilities, welding, flame cutting, and areas involving ferrous metals.

FR HI-VIS KNIT SHIRT (CAT 2, ANSI CLASS 3 TYPE R) | STFRC3

Can your FR garments stand the heat?

Our garments all satisfy the following safety protocols, a standard for safety in the workplace.

NFPA 70E The standard requires that:

“Employees shall wear arc-rated clothing wherever there is possible exposure to an arc flash above the threshold incident-energy level for a second degree burn...”

NFPA 2112 Regarding the manufacture of FR garments, states:

“The standard shall specify the minimum performance requirements and test methods for Flame Resistant fabrics and components and the design and certification requirements for garments for use in areas at risk from flash fires.”

NFPA 2113 Specifies:

“...the minimum selection, care, use, and maintenance requirements for Flame Resistant garments for use in areas at risk from flash fires by industrial personnel that are compliant with NFPA 2112, Standard on Flame Resistant Garments for Protection of Industrial Personnel Against Flash Fire.”

NFPA 45 Regarding fire protection for labs using chemicals states:

“In educational and instructional laboratories where experiments are conducted by students, the instructor shall be responsible for...the personal protective equipment required for the experiment...” and that, “Fire-retardant clothing shall meet the requirements of NFPA 2112.”

NFPA 652 Regarding the general requirements for managing combustible dust fire and explosion hazards states:

“...When flame resistant clothing is required for protecting personnel from flash fires, it shall comply with the requirements of NFPA 2112,” and that “Flame resistant garments shall be selected, procured, inspected, worn, and maintained in accordance with NFPA 2113.”

The OSHA General Duty Clause, requires employers to:

“...furnish to each of his employees employment and a place of employment which are free from recognized hazards that are causing or are likely to cause death or serious physical harm to his employees.”

OSHA's 29 CFR1910.269 states:

“The employer shall ensure that each employee who is exposed to the hazards of flames or electric arcs does not wear clothing that, when exposed to flames or electric arcs, could increase the extent of injury that would be sustained by the employee. This apparel standard applies to all apparel worn by an employee exposed to the hazards of flames or electric arcs.”

OSHA's 1910.132 ruling states:

“Except as provided by paragraphs (h)(2) through (h)(6) of this section, the protective equipment, including personal protective equipment (PPE), used to comply with this part, shall be provided by the employer at no cost to employees.”

FLAME RESISTANT

ENHANCED VISIBILITY

Safety is a key component to your work attire, so we've created a line of shirts to help keep you seen. Our enhanced and hi-visibility clothing includes color retention and flexibility while also featuring 360-degree visibility with front and back reflective striping.

ENVIRONMENTAL

Wildman's Waste Minimization Solutions

Meet regulatory and ISO requirements.

Our Environmental Solutions are constructed, processed, and serviced to allow you to meet your environmental obligations and save money.

Do you produce:

- ✓ Hydraulic Fluid?
- ✓ Coolants?
- ✓ Solvents?
- ✓ Ink?

What if you could:

- ✓ Lower Cost?
- ✓ Reduce Waste Immediately?
- ✓ Meet ISO 14001 Objectives?
- ✓ Create safer and cleaner workstations?

NO WASTE

No waste is generated, only soiled items for laundering and reuse.

RECOVERED FLUIDS

State-of-the-art process recovers fluids from the soiled items and are used as a secondary fuel source.

RE-USE

Clean items are delivered to your facility for use again and again.

ISO 14001 Requirements:

- Reducing Environmental Impacts of Identified Aspects
- Preventive Action
- Continuous Improvements
- Pollution Prevention

EPA Mandate:

"Materials containing or otherwise contaminated with used oil from which the used oil has been properly drained or removed to the extent possible such that no visible signs of free-flowing oil remain in or on the material may be disposed of in a solid waste disposal facility, provided the material is not listed or identified as hazardous waste."

40 CFR 279.10 (c)

OSHA Mandate:

"The floor of every workroom shall be maintained in a clean and so far as possible, a dry condition. Where wet processes are used, drainage shall be maintained and false floors, platforms, mats or other dry standing places should be provided where practicable."

29 CFR 1910.22(a) (2) [1997]

FIRST AID

You have a million other things to do.
Get time back in your day with first aid
service from Wildman.

FIRST AID CABINET

- Red cabinet stands out making it easy for employees to find.
- Stocked with only approved items.
- Cabinets are checked for expired products and disinfected at each visit.

WOUND CARE

- Includes variety of strengths, materials, and sizes.

SPRAYS AND WIPES

- Essential items for cleaning wounds, preventing infection, and soothing burns.

OTC TREATMENTS

- FDA approved/registered OTC's.
- Brand names and our trusted Provision brand included.

BLOOD BORNE PATHOGEN KIT

- Contains solidifier, disinfectant wipe, and antimicrobial wipe.
- All kit components are disposable.

BANDAGES

- Includes a variety of sizes.
- Standard, Hi-Vis metal-detectable, and waterproof bandages.

OINTMENTS

- Individually packaged as single use doses to prevent cross contamination.

SIMPLIFY YOUR FIRST AID PROGRAM

1

Wildman starts by installing your easily recognizable RED cabinet.

51% of employees don't know where their first aid cabinet or AED is in their facility. Our RED cabinets stand out and help employees recognize their location, whether in an emergency or not.

Based on your needs and cabinet quantity, your dedicated Wildman rep will regularly visit your facility.

Wildman is the safety expert. We eliminate you having to track inventory on multiple first aid supplies and cabinets.

2

We record inventory usage and report items that need replenishing.

No more running to the store to buy your own products or worrying about having enough supplies to cover your whole team. We will consistently service your first aid based on your needs.

3

After restocking and removing expired products, your cabinet will be organized and disinfected.

With each visit, we disinfect the cabinets and remove expired products, so your first aid cabinet will always be safe and ready to go at a moment's notice.

4

Your Wildman rep will finish the visit by reviewing the replenished products with you and discussing any additional needs.

We audit your unique first aid cabinet needs and manage the first aid service for you, keeping your team safe and your company compliant. And we'll never 'stuff' your cabinets with things you don't need.

5

FIRST AID

AED

When seconds count, know that your facility has an AED you can always count on.

AUTOMATED EXTERNAL DEFIBRILLATOR (AED)

Nearly 10,000 sudden cardiac arrests occur in the workplace annually

(according to the U.S. Occupational Safety & Health Administration.)

Is your team properly prepared? Ask yourself a few simple questions:

Are my employees protected in the event of a sudden cardiac arrest (SCA)?

The survival rate for cardiac arrest goes down by 10% for every minute that defibrillation does not occur. The odds aren't favorable, as the average response time of a first responder is 8–12 minutes.

A working and reliable AED is the best way to prepare for this emergency. Using an AED within 3–4 minutes of a sudden cardiac arrest increases the survival rate to 60%.

Am I sure our AED is in working order?

Pads and batteries can expire or become outdated. Just like your phone or computer, the software function of the AED needs updated from time to time. If any of these are not kept updated, your AED may not work properly.

Do my employees know how to properly use the AED?

The AED is only useful if your team knows how to use it. We offer in-person, AHA-certified compliance training in several areas including CPR/AED training, ensuring that you maximize your investment and improve employee confidence.

Sudden cardiac arrest can happen to anyone at any time.
Keep your team and visitors protected!
Schedule your free, no-obligation AED consultation.

SAFETY

Keep your employees and workplace safe with Wildman safety training, products, and services.

COMPLIANCE SAFETY TRAINING

Create a Safety Culture

Educate your employees on lifesaving practices and receive certification from the American Heart Association with our AHA Certified Safety Trainers.

Personalized Hands-On Training

Classes feature a 1:12 instructors to participant ratio, ensuring personalized learning within a group context. Through interactive scenarios and hands-on practice, our trainers ensure your confidence is critical safety skills.

Certified & Experienced Instructors

As experienced AHA Instructors, Certified Wildman Safety Trainers have demonstrated a proficient knowledge in all first aid programs. Upon completion, participants will receive a 2-year electronic certification.

Convenient Scheduling

We work with your schedule. On-site instruction includes taking care of equipment setup and ensuring your team is well-prepared for emergencies.

SAFETY

A first impression is formed in .05 seconds.
Don't let a dirty restroom cost you valuable customers or employees.

CLEANTEAM DEEP CLEANING SERVICE

A clean restroom reduces the spread of diseases, bacteria, and viruses.

Let Wildman CleanTeam deep clean and sanitize your facilities as an effective and simple step you can take to keep your team safe and healthy while making a favorable impression on customers.

Wildman CleanTeam Offers:

- ✓ Ongoing cleaning plans
- ✓ Expert consultation
- ✓ Deep cleaning of your facilities to protect your team
- ✓ Kills 99.999% of germs
- ✓ Ask about a **free demo!**

Cleaning Checklist

PRE-TREATMENT:

- ☒ Clean faucets, toilets, urinals, and counters

DEEP CLEAN:

- ☒ Spray disinfectant on toilets, urinals, sinks, and countertops
- ☒ Apply cleaner and scrub floors
- ☒ Scrub urinals and commodes (inside and out!)

FINISH CLEAN:

- ☒ Power rinse
- ☒ Squeegee vacuum wet floors
- ☒ Wipe down mirrors and dispensers with white towel

COMPLETE CLEAN:

- ☒ Apply enzyme treatment and odor eliminator counteractant for toilet, urinal, sink, and floor drain
- ☒ Install urinal screens
- ☒ Hang new air freshener

OPTIONAL UPGRADES:

- ☐ Install Omni Guards odor eliminator (urinals) and Omni Rings toilet bowl cleaner (commodes)
- ☐ Replace/add urinal mats and commode mats

CLEANTEAM

CLEANMIST

Kills 99.999% of germs.

CLEANMIST SYSTEM

Keep your facility safe.

It's critical for you to keep your team and customers safe. But with all of the traffic in your facility and numerous areas to clean, staying on top of it can be a tedious process that your team just doesn't have time for. Let the Wildman CleanTeam take care of protecting your team and facility so you can focus on running and growing your business.

Our electrostatic, ultra-low volume (ULV) misting machines transform liquid chemical disinfectants into a mist that our technicians apply to the surfaces of your facility.

- ✓ Kills 99.999% of germs (including COVID-19!)
- ✓ An EPA registered, hospital-grade disinfectant
- ✓ Non-corrosive

Ask about how we can apply this treatment to your:

- Bathrooms and locker rooms
- Gyms and playgrounds
- Lobbies and hallways
- Conference rooms and meeting spaces
- Kitchens and break rooms
- Furniture, chairs, and desks
- Computers and keyboards
- Offices and cubicles
- Warehouse and production plants
- Manufacturing and services areas
- Machinery, tools, and equipment
- Outdoor areas
- And more!

RESTROOM PROGRAMS

First impressions are vital for your business. Regardless of industry, a restroom's cleanliness directly impacts business and the ability to attract and retain customers and employees.

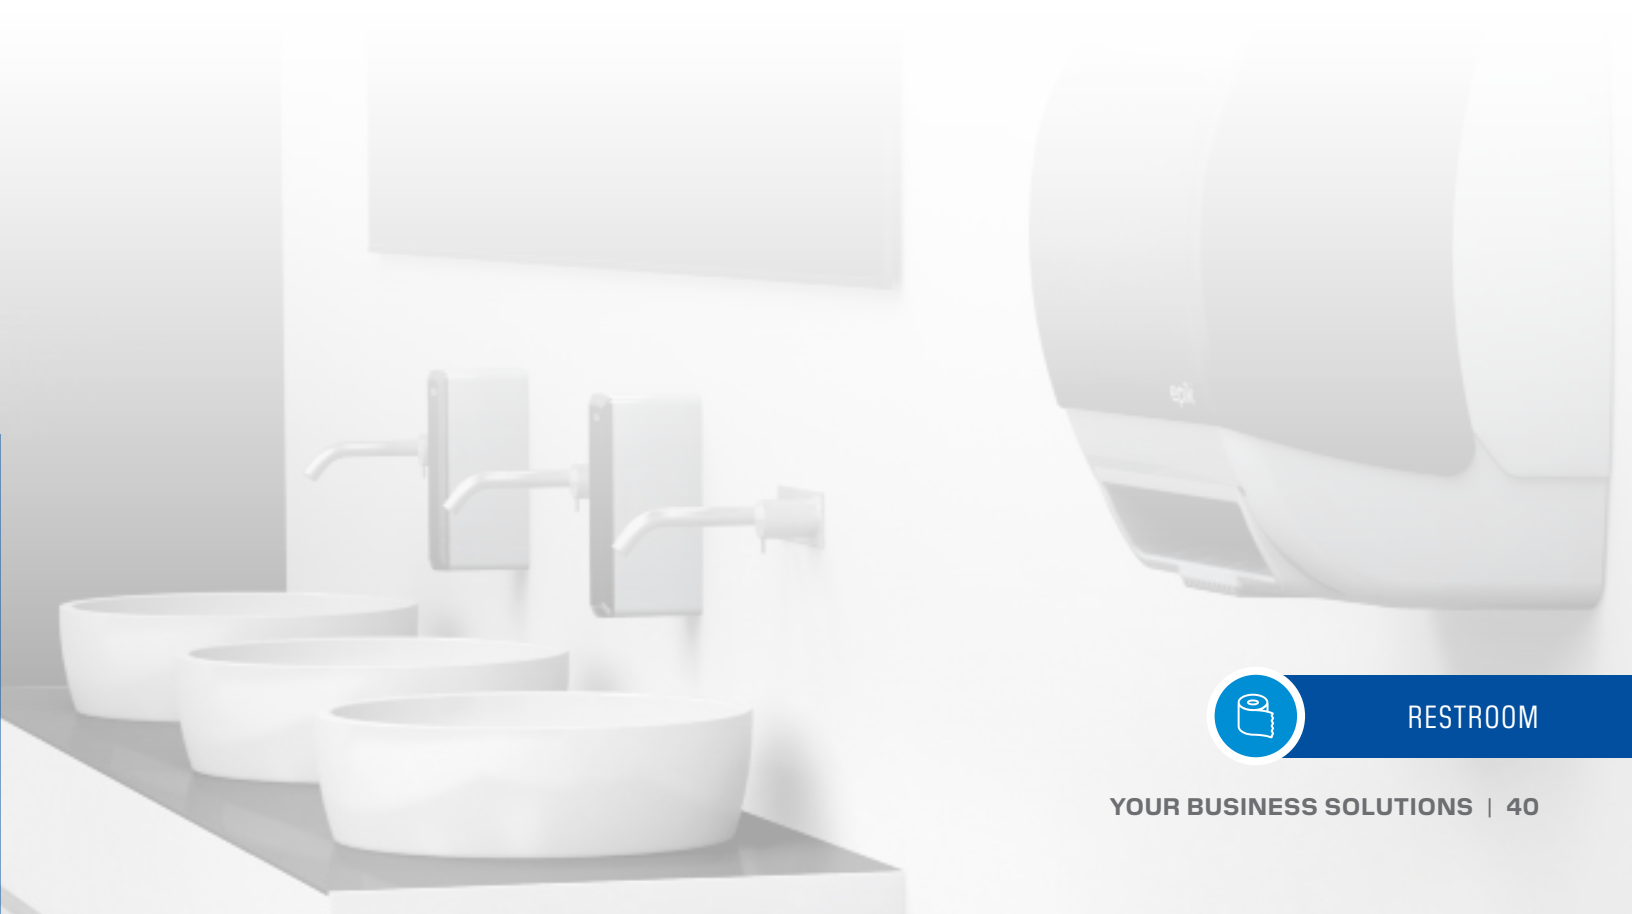

WHY USE A RESTROOM PROGRAM?

Wildman's exclusive Epik line was designed and created to keep your facility clean, safe, and looking great.

- **Eliminates** the burden of sourcing/purchasing/stocking products yourself
- **Ensures** your highest-impression facility area is smelling and looking great
- **Enhances** your company's image for customers and employees with clean facilities and modern dispensers

Customers and employees form a first impression of your business based on the first .05 seconds of walking into your restroom.

Make it a favorable impression with Wildman's exclusive Epik line.

LOW DENSITY LINERS

These liners offer great stretch and tear resistance and are measured in millimeters.

Recommended for sharp or rough objects, such as:

- Yard Waste
- Glass
- Industrial Waste
- Restaurant Trash

VS

HIGH DENSITY LINERS

These liners offer significant material and cost savings, but tear easily when punctured. High density liners are measured in microns.

Recommended for lighter, non-sharp trash, such as

- Paper
- Bathroom Waste
- Office Waste

DETERMINING THE RIGHT CAN LINER

Will sharp objects or heavy, wet trash be disposed of in these liners?

✓ **YES:** CHOOSE LOW DENSITY CAN LINERS

Low density liners are best for kitchens and yard waste, when trash will be heavy, wet, and/or sharp.

✓ **NO:** CHOOSE HIGH DENSITY CAN LINERS

High density liners are thinner and more prone to tearing than low density liners, so they are best for offices and bathrooms, where trash is light and soft.

What size liner do I need?

Can liners are measured by their length and width when laid flat. To determine what size liner is needed for your particular trash receptacle:

BAG LENGTH = Height of your can plus 3" overhang

BAG WIDTH = Circumference of your can divided by 2

Square Can Circumference = Sum of all four sides

Round Can Circumference = Diameter multiplied by 3.14

How much weight will these liners need to hold?

Simply estimate how much weight you place in a can liner during every-day use. Then refer to our liner charts and match the estimated max weight to the density and size calculated from the information above.

CAN LINERS

DILUTION SYSTEM & CHEMICALS

Your efficient chemical solution.

WILDWORX CHEMICAL DILUTION SYSTEM

Make your facility cleanliness and employee safety easier and more efficient than ever before.

With our Chemical Dilution system, you are ensured proper mixing ratios and better cleaning results with concentrated cleaners.

Chemical Dilution system:

- ✓ Reduces chemical and packaging waste
- ✓ Helps prevent spills and the potential for workplace injuries
- ✓ Eliminates the need for storage space
- ✓ Takes the guesswork out of diluting and ensures proper ratios

CONSULTATIVE APPROACH

You'll have complete transparency and control throughout the process.

CONSOLIDATED VENDORS

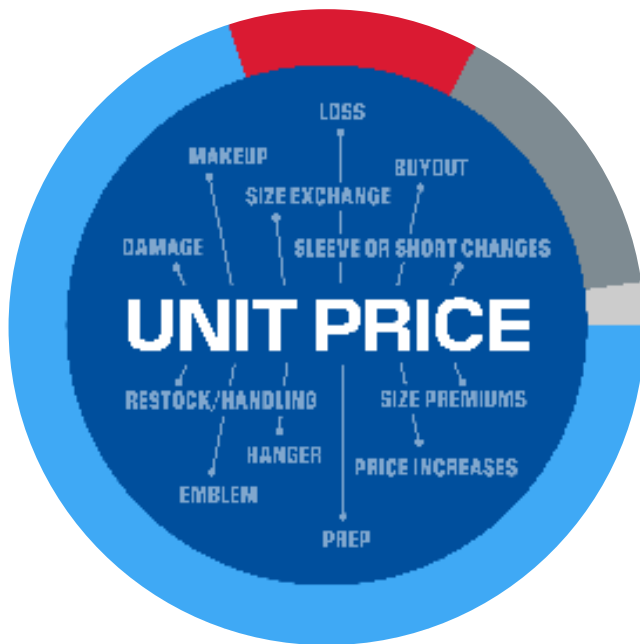

Eliminate the headache of partnering with separate vendors for all your needs and experience time and cost savings and less stress with one vendor. Service you can trust.

OUR ASSURANCE PROGRAM

"I am satisfied with the ease of reviewing invoices. Their way is standardized and easy to read. With my previous vendor, I never knew how my prices kept fluctuating, but Wildman's invoices are easy to understand."
—Wildman Customer

WITH OTHER PROVIDERS

What You're Paying

- NON-UNIFORM ITEMS 13%
- UNIFORM RENTAL GARMENT 15%
- DAMAGE INSURANCE 2%
- ANCILLARY 70%

Figures collected from an actual national provider invoice breakdown

Other providers focus only on unit price. But don't be fooled. That's only part of the equation for your real uniform rental cost. What they're not telling you is all the other expenses you'll encounter with time that can inflate or even **double your budgeted uniform spend!**

WITH WILDMAN

Wildman's no hassle flat rate assurance program eliminates unexpected charges, making it easier for you to read invoices and budget your teams' uniforms correctly.

WILDMAN'S PROGRAM
OTHER PROGRAMS

THE WILDMAN
DIFFERENCE

GARMENT REPAIR AND AUTOMATIC SORT SYSTEM

Our unique garment barcoding system coupled with our proactive repairs means your team will always look their best.

- ✓ Virtually eliminate uniform shortages. You get back what you turn in. Every garment is given a barcode with an image expectation that is triple checked weekly
- ✓ Wildman is the only uniform provider with quality-graded barcoding standards. This allows you to create specific care standards by wearer
- ✓ All garments are repaired or replaced as necessary. Approximately 70,000 uninitiated repairs done annually
- ✓ 2% of garments are repaired weekly based on uniform inspectors

DEDICATED TO CUSTOMER SERVICE

Proactive Account Management

Regularly conducted customer experience review visits

Account Service Representatives with handheld computers to make changes onsite

Account Service Representative, Customer Development Representative, and Service Management assigned to your account

24 Hour Response Time Guarantee

Live person answering the phone

Call sent to assigned service rep and responded to in 24 hours

Weekend on-call service representative

THE WILDMAN
DIFFERENCE

ONLINE TRANSPARENCY & ACCOUNTABILITY

Go Green with Paperless Billing

Less paper waste for the Earth.
More easily convenient for you.

Enhanced web portal capabilities

Collaborate more easily with team

Increased document security

Improved electronic customer service

Free up document storage space

SMART GARMENT REPAIR APP

Each uniform wearer can track their garments and request repairs so you have one less thing to worry about. Simply scan your garment, fill out the repair request, and place in the standard garment return.

- ✓ Repair Requests
- ✓ Uniform Tracking
- ✓ Garment Lookup
- ✓ Quick and Easy

THE WILDMAN
DIFFERENCE

GREEN BENEFITS

wildly green

Sustainability starts here.

We're committed to a sustainable future through environmental stewardship and conservation of the earth's natural resources. We are continually reducing our environmental footprint with the innovative products and services we provide.

Pre-Wash

Soiled laundry is unloaded from our trucks and weighed in reusable cloth bins. This process ensures the correct amount of water and detergent are used for an efficient washing and drying process. We do this for all our laundered items: uniforms, mats, aprons, rags, and many more. The pre-wash stage has the task of setting up the rest of the process to use less energy, water, and chemicals.

Laundering

In the laundering process, we have over 40 different wash formulas based on item type. Each of these have been eco-friendly perfected to reduce machine run times, improve garment life, and ensure our laundered items look better overall. Our low alkali wash technology is specially formulated to suspend soils and condition water hardness contaminants, making the overall soil removal process easier and more effective.

Post-Wash

After items are laundered, we collect the water drainage to use as a secondary fuel source. This helps us keep our water temperatures higher, which then requires less energy for us to get the water to the proper temperature for the next load. Once we are done with the water, it is treated with sulfuric acid to balance pH levels before it is sent back to the city.

Hanger Recycling

Each week, we deliver over 60,000 uniforms on wire hangers. As you can imagine, we go through a lot of wire hangers. We have staff members specifically dedicated to repairing our hangers, allowing us to recycle 65% of our wire hangers and reduce the number of hangers that end up in landfills.

Technology & Automation

We use automated technology, barcode scanning, and a user-friendly app to ensure products meet our highest quality standards. This automation reduces the energy and time it takes to fix/replace damaged products and also makes the entire process cleaner and safer.

Exhaust System

Our efficient exhaust system allows us to achieve high air quality both inside and outside our facility. We operate under an air quality permit through the Indiana Department of Environmental Management (IDEM) to ensure we are meeting statewide environmental regulations.

Safe Dryer Lint

Think of how much dryer lint you accumulate doing laundry in your home. Now imagine if you laundered over 425,000 POUNDS of laundry per WEEK! We end up with a lot of dryer lint, which is why we have it tested regularly to ensure it meets and exceeds requirements that make it safe for disposal in landfills.

Box Reuse & Recycling

We implement an internal recycling program to reuse cardboard boxes to ship loads between our depots as much as possible. This reduces overall waste and keeps trash out of landfills. Every change we make can have a major impact.

Garment Recycling

Scrap garments and towels are recycled and repurposed to be sold to select customers. This reduces the number of garments that end up in a landfill.

**YOU SUPPORT A CLEANER, SAFER, AND HEALTHIER PLANET
BY PARTNERING WITH WILDMAN.**

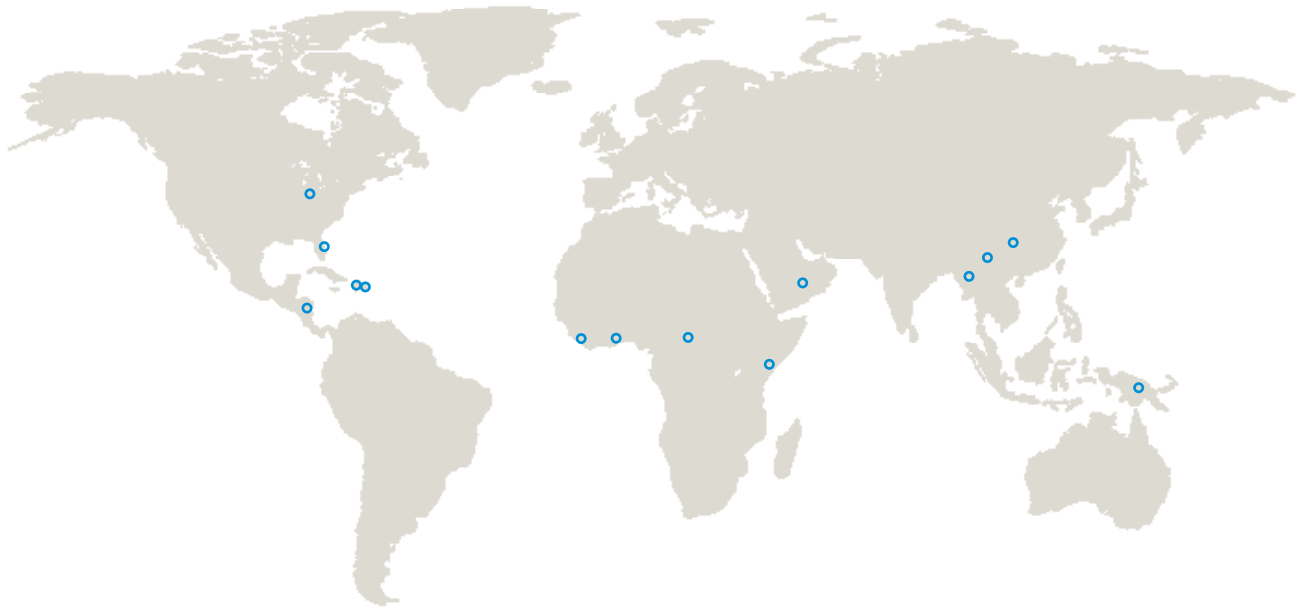

Thank you for trusting us to be your environmentally-responsible provider of choice.

THE WILDMAN
DIFFERENCE

A photograph of a smiling man and woman holding two young children. The woman is on the left, wearing a light-colored t-shirt, and the man is on the right, wearing a white t-shirt. They are both holding a young boy. The boy on the left is wearing a blue t-shirt and the boy on the right is wearing a dark blue t-shirt. They are standing in front of a wall with colorful graffiti. The text "Wildman proudly sponsors organizations across the world, including schools in Honduras and Dominican Republic." is overlaid on the top right of the image.

Wildman proudly sponsors organizations across the world, including schools in Honduras and Dominican Republic.

WE COMMIT *20%* OF OUR PROFITS TO OUR COMMUNITY & WORLD MISSIONS.

At Wildman, we connect image to branding and profits to purpose. As your partner, we not only strive to enhance your brand, but partner for good within our own employee base, in our community, and around the world.

LoveWorks is Wildman's effort to cultivate a culture of generosity and gratitude within our company, community, and beyond by providing hope and light to those in need.

THE WILDMAN WAY

FREQUENTLY ASKED QUESTIONS

Where do you service? Can you provide items for my multiple-location company?

Wildman is headquartered in Indiana but has locations throughout the Midwest to cover a range within Northern and Central Indiana, Central and Southern Michigan, Eastern Illinois, and Western Ohio. We also leverage other family-owned laundries through an industry network to provide consistent service to businesses outside of this service area.

Will my invoice fluctuate from week to week?

There are several items in addition to the unit price that some providers within our industry typically charge for at times. These include items like damage, prep, loss charges, and many more (see page 50). These charges can drastically increase your bill from week to week. With Wildman's custom assurance program, we eliminate unexpected charges keeping your budget consistent week to week.

What is the best way for me to order facility service supplies such as paper, toilet paper, soap, etc?

Wildman has implemented a very popular vendor managed inventory (VMI) program which takes all of the work in ordering these types of supplies off your plate. Our ASRs are trained to maintain a specific par level of inventory at your facility that is determined up front by you to ensure you always have these items on hand and do not have to spend time sourcing, receiving and unloading or storing them. We will not force load you into inventory levels that you do not need and your minimum par levels can be adjusted up or down at your convenience depending on the needs of your business. We are able to free up a tremendous amount of time for you or your staff on items you are using every day.

What happens to my bill when I don't get all the uniforms back that my employees turned in the prior week?

With many uniform companies, you still end up paying for these missing uniforms unless you have enough time to review your bill and confront your current supplier. Wildman has virtually eliminated uniform shortages through our automated sort system but in the rare case there is a uniform shortage, no charge would be applied to your bill with our no hassle assurance program.

How many rental item price increases are allowed within uniform agreements?

Most uniform companies will implement "at will" price increases where their contracts state they have the ability to increase pricing at any time. Wildman believes in simple transparency with our agreements in that we only implement a price increase on your rental items once annually so you can better plan your annual budget and confidently know what your uniform spend is.

What happens when I have a change request but miss telling my route driver about it when they are at my business?

With other uniform providers if you miss telling the driver about any updated information you may have to wait until the next scheduled delivery day or take time to call the customer service line for help in updating your account. With Wildman, we have both a portal for 24/7 access as well as a mobile app that can be accessed anytime to keep your account up to date with little effort on your part.

How do my uniforms get repaired when they are damaged?

With other uniform providers, you will need to fill out a card that is physically attached to the garment needing repair. Many times this can get separated from the garment in the wash transition and the repair never gets completed. With Wildman, we do not rely solely on the repair card. We also have a mobile app where your employees can scan the barcode on each item and quickly and easily request a repair through our online app, assuring garments are repaired promptly. We also have uniform inspectors who catch a number of repairs your team members may have missed.
