

FIRST AID PROGRAM

KEEP YOUR TEAM SAFE.

1

Based on your needs and cabinet quantity, your dedicated Wildman rep will regularly visit your facility.

Wildman is the safety expert. We eliminate you having to track inventory on multiple first aid supplies and cabinets.

Wildman starts by installing your easily recognizable RED cabinet.

51% of employees don't know where their first aid cabinet or AED is in their facility. Our RED cabinets stand out and help employees recognize their location, whether in an emergency or not.

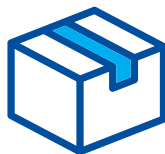

2

We record inventory usage and report items that need replenishing.

No more running to the store to buy your own products or worrying about having enough supplies to cover your whole team. We will consistently service your first aid based on your needs.

3

After restocking and removing expired products, your cabinet will be organized and disinfected.

With each visit, we disinfect the cabinets and remove expired products, so your first aid kit will always be safe and ready to go at a moment's notice.

4

Your Wildman rep will finish the visit by reviewing the replenished products with you and discussing any additional needs.

We audit your unique first aid kit needs and manage the first aid service for you, keeping your team safe and your company compliant. And we'll never 'stuff' your kits with things you don't need.
